

RE: Your Dell Case ID: 160497383

trusty1@zoho.com | THU JAN 19 4:12 PM | 17 min read

You never changed the thermal paste? This is your responsibility, and should have been done in 2021. The state AG, FTC, the bank, and ripoffreport.com, and the SANE list who I am contacting.

Randal

> > > 2) Broken Atomic Mode Set running (shutting off Atomic).

> > >

> > > I have shut down the laptop to avoid damaging the hardware that you just installed. Doesn't look like your technicians bothered to check whether or not their fixes remedied the problem, and they just threw in some components hoping that magically everything would work. What diagnostic tools did they run?

> > >

> > > I don't have my internet gongle with me, and left it at the office in the bay area 400 miles away. As a result, i can't run updates which limits me to running additional diagnostic tools, but the message from dmesg is sufficient evidence that the thermal issue is not resolved. Who is your thermal engineer? Do you have a US based thermal engineer in the states? If not, you are probably not going to be able to fix it. However, there is a really good one I used to work with in Tuscon, AZ.

> > >

> > > As someone who has worked extensively with asia in electronic manufacturing, there isn't a lot of loyalty to the US these days when working with most of the countries, particularly in east Asia. The further west you go in Asia, the better the loyalty is, but at the end of the day you should be questioning whether or not this makes economic sense. Right now it is very difficult to get stuff out of Asia due to a shipping embargo caused by Covid, and the long backlog. Additionally China makes the containers these days, and hasn't been producing a sufficient number of containers to accommodate other Asian countries shipping needs, particularly if going to the US. This is what I hear from the US rep for Nichiha, a manufacturer of quality fiber cement board.

> > >

> > > What is the next step? Can you fix this thermal problem? Do you have a US based thermal engineer? There is a really good one I used to work with in Tuscon if you don't already have one, and he wasn't over-priced and well versed. > > > > Randal South > > 650-479-5740 > > trusty1@zoho.com> > > > > > ---- On Wed, 18 Jan 2023 09:26:49 -0800 Dey, Samiran wrote --- > > Dell Customer Communication - Confidential > > Dear Randal, > > This e-mail is in regards to the conversation that we had earlier today about your Dell Computer.

As a result, the warranty would be extended had I not had an extended warranty agreement in place. Since Dell won't repair, the money has to be refunded.

> > > >

> > > > History. The first complaint made to Dell due to overheating, and hardware failure was made in mid, and late 2021, and Dell just outright refused to honor their warranty, and accept the fact that the laptop was defective. A decision was made to purchase an extended warranty policy from Dell which extends the laptop's warranty to mid April 2023 (see attached) > > A 3rd complaint was made to Dell in May 2022. Dell sent a return box in May 2022, and decided to send the laptop back in January 2023 without repair. To conceal the incident Dell deleted the incident from their records (see Fedex Tracking Number 576372286007).

> > > >

> > > > Another complaint was made to Dell on or about 01-09-2023, and instead of picking up the laptop in Palo Alto, Dell sent me a return box to Crescent City (see attached). Another complaint was sent to Dell instructing Dell "not to ship a box", and instead to have FedEx just pickup the laptop from Palo Alto, and take it to their Texas service Center, but Dell refused to do that, and instead sent another box to Palo Alto even though the laptop is sitting on the front porch all boxed up, and ready to be picked up.

> > > >

> > > > Subsequent calls to Dell have not been responded to, and its quite apparent they have no intent to fix the laptop. Dell is guilty of constructive fraud. Please review the documentation, and you will find that there is no case number for

the laptop received by them on or about 01-06-2023. Dell reports they canceled the trouble ticket, and just returned the laptop to me without repair.
