Where does my refund stand, because I never got the Wed trade info, nor did I get the “extra trade due to technical issues” I was supposed to get on Thursday?

Again this came out so late that QQQ was already at \$256, which is above the targeted \$255 Call price.

How do I get my \$199 back, because this is already 3 trades I’ve missed out on as a result of delays and “technical glitches”?

Thanks...Tom
