ADAM ZUCKERMAN: Whereas this you're just

gonna get hopefully a bunch of doctors that do have some disposable cash that are egomaniacs, don't like the fact that they're being told that they cut

7

6

someone's uterus in half.

9

8

10

11

24 25

So in this particular scenario it's a direct hit of direct marketing, we think. Because what we're essentially doing is is we're identifying the person who has a specific problem. We're pointing out the problem of where they're being offended.

We're bringing -- making them aware of it. It attacks their ego, it attacks their business. And we're telling them that we can eliminate the problem. That's about as direct as you can possibly get. we'll see how we do on the calls which are scheduled for money with respect to conversion.

But what we do know is that we think the quality of the lead is probably pretty good because we know what the lead is. So it's probably at this point, guessing on the quality of the lead as far as our target market goes, as far as who we're going after?

The quality here Michael said might be a Maybe that will increase. But the quality three.

1 here you would think is probably an eight plus, 2 depending on who the doctor is and what the scenario 3 is. Why is it a high-quality lead? Because we 4 5 know exactly who they are and why they're calling, 6 what their problem is, and the fact that they need to 7 get rid of it. So the only reason it wouldn't be a 8 ten is we can't be for sure that somebody else hasn't 9 pitched better or against us. But we know it's a good 10 lead. 11 So we did a test. We sent out, you know, 70 12 or a hundred or whatever. And so far on a Friday, 13 within a few hours, we've got some responses. 14 getting any kind of response to a spam campaign on a 15 Friday, with doctors that could be in and out of 16 surgery, or the office, or what have you. 17 Knowing there are gatekeepers. Assuming that 18 they're younger guys, they check their own email, they 19 got Blackberries. They're more in the groove now. 20 And it's ego-based stuff. The fact we got four or 21 five replies, perhaps --22 RYAN PAGE: We're 70 -- the numbers are 73, 23 17, and 4. So 73 messages went out. I assume that 24 some of those are ours, but. 25 ADAM ZUCKERMAN: Seventeen opened?

```
1
              RYAN PAGE: Seventeen opened. And it was
    opened like 42 times, so it was co-people opened each
 2
 3
          And then 4 people that initiated contact for
     (inaudible.) It looks like 3 out of 4 probably,
4
 5
    because one of them was maybe not --
6
         (Inaudible - speakers talking over one another.)
7
              PAUL PORTELLI: What was the 17?
8
              MICHAEL ROBERTS: Would have been --
9
              RYAN PAGE: People who opened it.
              PAUL PORTELLI: Okay.
10
11
             RYAN PAGE: Contacts that downloaded the
12
    image.
13
             MICHAEL ROBERTS: But they were opened 43
14
    times.
15

                                  Three out of four.
16
         (Inaudible - speakers talking over one another.)
17
              RYAN PAGE: And they're --
18
              PAUL PORTELLI: So they reopened -- 17 people
19
    reopened them quite a few times to get to 43, right?
20
              RYAN PAGE: Yeah.
21
             ADAM ZUCKERMAN: Yeah, or gatekeeper opened
22
    it --
23
              PAUL PORTELLI: Yeah.
             ADAM ZUCKERMAN: Or they put it on their --
24
25
             KIRK McMAHAN: And --
                                                         4
```

```
1
         (Inaudible - speakers talking over one another.)
 2
              KIRK McMAHAN: That's, that's not one
 3
    hundred percent open, that's just the downloading of
    the image.
 4
 5
              PAUL PORTELLI:
                             Okay.
                             Especially people using PDAs,
 6
             KIRK McMAHAN:
 7
    you can read an email without choosing to download the
 8
    image.
 9
              PAUL PORTELLI: Does it --
10
              KIRK McMAHAN: We do it all the time.
              PAUL PORTELLI: Does it track the -- any
11
12
    forwards? If somebody forwards it to somebody else?
13
    Is that just kind of the second opening?
14
              KIRK McMAHAN: It's got a forward, it's got a
15
    forward-to-a-friend link, which it tracks. But if you
16
    just --
17
              PAUL PORTELLI: If you just forward it?
             KIRK McMAHAN: If you just hit forward it,
18
19
    it's, it's not in there (inaudible) --
20
              PAUL PORTELLI: So --
21
              KIRK McMAHAN: It's not in (inaudible.)
22
              PAUL PORTELLI: Okay, got it.
23
             ADAM ZUCKERMAN: So you guys can get into all
24
    your technical discussions about how you want to scope
25
    around, you know --
```

1	MICHAEL ROBERTS: He's the gig, not me.
2	(Inaudible - speakers talking over one another.)
3	ADAM ZUCKERMAN: okay? Do that another
4	day.
5	RYAN PAGE: It's a one, a one percent res
6	a one
7	SPEAKER UNKNOWN: Ripoff (inaudible) great.
8	(Inaudible - speakers talking over one another.)
9	ADAM ZUCKERMAN: Refine it, make it better
10	than ever. But the bottom line is, is just that on
11	its own for a test campaign is a great response.
12	MICHAEL ROBERTS: Uh-huh.
13	ADAM ZUCKERMAN: Now, this has nothing to do
14	with us actually proactively next reaching out and
15	calling them and saying, Did you get the email? Are
16	you aware of this?
17	Let's say it doubles that. We're already a
18	good response. Okay? If we sent out 750 of these and
19	we had 40 or 50 responses right now, that would be
20	pretty good. Okay? If we could double that to a
21	hundred by making phone calls, that would be really
22	good.
23	So the idea here is it looks like the concept
24	of the campaign works pretty good. We know it's a
25	targeted audience. We know what their problem is.

Now we need to get on the phone and effectively close them. Which comes down to the next issue, which is contact ratio. Can we contact them?

Since they reached out to us, contact ratio's

pretty good. They've already initiated contact, so you'd think getting back to them they're gonna be receptive. So let's assume the contact ratio concept's gonna be pretty high. Or the element is gonna be pretty high.

Closed ratio is yet to be determined. Closed ratio is an unknown variable because we don't know what we're gonna get on the other side of the song.

Okay? Lot of it has to do with our pitch. We feel like our pitch is pretty strong.

And we don't know whether they're going to respond by saying, I got ten of you to call me. My guess is if they responded to you they probably haven't been saturated by a lot of people bothering them or bringing this to their attention.

Or maybe they have and they haven't had luck because the person they hired to do it didn't get the job done. In which case the close is gonna be even stronger.

So this is an unknown variable right now.

But you think it's pretty good because we got a good

value proposition, we know how to sell it, and we believe that they're receptive to needing the service. So that's something yet to be found out, close ratio.

Once we determine the close ratio and the overall contact ratio we're gonna get to our short-term CPA. Our cost per acquisition. Once we get to our short-term CPA and we know that that's good, that gives us a good indication that at least within the scope of this direct marketing through a particular channel of the Ripoff Reports, doing scraping with our scouts, without get -- making a sophisticated filtering system or any auto bots that are gonna help her job exponentially increase and become more efficient? She's having to go through, and she's catching names and she's saying, Oh, I already called you and sent you an email because you're on the Ripoff Report five times.

So we need to create something that allows us to immediately identify somebody and go -- rather the best thing for her to do is if we could actually build something that would allow us to go in, identify all the names of the doctors, and pull them all up to find out how many hits they have.

So all of a sudden you have a grid -(Inaudible - speakers talking over one another.)

24

25

1 ADAM ZUCKERMAN: You have a grid from left to 2 right, right? And it starts with like, you know, 20 3 to 1, right? And imagine if you could run a report and all of a sudden it populated with a hundred 4 5 doctors and filled them in on the grid. 6 Five of them have 10 Ripoff Reports. 7 know, 30 of them have one Ripoff Report. And then 8 everybody is in the middle. So then you could pro -hit a very specific targeted campaign towards people 9 10 who are blasted with Ripoff Reports. Dear Butcher --MICHAEL ROBERTS: Mm. 11 ADAM ZUCKERMAN: -- you're about to lose your 12 medical license. Would you like us to remove some of 13 14 these things? Right? And then on, and on, and on. 15 The question is now who's gonna develop the 16 technology to figure out, instead of her having to 17 hunt and peck and list it herself. Right now she's 18 gotta hunt and peck and list it herself. We need to 19 make that more efficient. Okay? 20 So then we get to short-term CPA and 21 long-term CPA that's gonna be based on a six-month 22 cycle that's gonna tell us, on a drip campaign,

top-of-mind awareness to where they convert into

grow, what's the aging cycle. And what's the

whether or not we increase, as the soup pool starts to

business. We don't know that yet.

Okay. So on the organic side we have no idea what's going on on the organic side because we haven't yet started to play with that. Which will -- that will happen next week. Meaning you're gonna jump in on the leads that we've got coming in on this side and everybody's gonna test close those.

And then we're gonna listen in on the leads you have coming in on the organic side. We're gonna help close those. Hopefully we get some high-profile ones, medium-profile ones. And we start to get the numbers tied in between organic and direct marketing, at least where the Ripoff Report goes.

Then we have a new co -- a new opportunity where, as Ryan -- I'll let him explain this -- his side of it better. But now that we're seeing that there are multiple -- what -- how do we sell this approach? Meaning the person gets on the phone and do we hit them for \$5,000? That's a price point someone's gotta really think about. Okay?

Or do we hit them for like a 995 and say,
Look, let's not talk about your entire reputation
issue right now. There's probably a lot of things
that might be out there that you want to get rid of,
or things you want to enhance to make your reputation

better. That's part of a more in-depth analysis.

How about we just establish a trust relationship right now and do what we say we're gonna do? Let's take one of your worst reports off for 995. And when we're done we're gonna call you, show you the results, and then we're gonna talk to you about what the next step is.

What would the next step be? The next step is we do an analysis, for 495 or whatever it might be, and we're gonna come back to you in 48 hours and we're gonna show you everywhere that you're getting hammered. Okay?

We're gonna give you a proposal to get rid of all of it. And if you want to do that we'll get rid of all of it -- which he'll talk to you about what that is. And then if you don't, we can do à la carte. And you can start checking off what you want to get rid off.

RYAN PAGE: Yeah. Is what I was thinking is I was thinking like, like, you know, we can move to more of an up-sale-type program where, if we get all these leads in the idea is that we want to have, you know, we want to have our close ratio as high as possible with these people and on as few calls as possible. Like, you know, never want anything that

1	goes longer than two or three phone calls.
2	And, and there shouldn't be much resistance
3	to buying, especially at our price. Because this, you
4	know, if we can make this a as our entry drive
5	people will come in, see a quick result. Then they
6	turn around and say, Okay, that, that worked out
7	really good.
8	Then, you know, then they turn around and
9	you're, you're primed. They've already got a good
10	result. Now you can start talking to them about the
11	ongoing things where we can create like an on, an
12	ongoing drip.
13	KIRK McMAHAN: I, I thought we replaced all
14	the I thought it was replacing the negative with
15	the positive and pushing the negatives down into
16	oblivion. I didn't think we could
17	ADAM ZUCKERMAN: No.
18	KIRK McMAHAN: hit like a sniper.
19	ADAM ZUCKERMAN: No. That's what you're
20	selling against. Okay?
21	KIRK McMAHAN: Okay.
22	ADAM ZUCKERMAN: When, when the
23	customer gets on the phone and says, You know what?
24	Five people have called me about this.
25	Well, you know what? All five of those

```
1
    people don't do what we do. You need to read some
 2
    information about who we are. We're one of the few
 3
    companies, if not the only company in the country or
4
    in the world -- however you want to spin this, I'm
 5
    just going off the cuff -- who actually has the
6
    technology, and will remove -- and, and will make
7
    it --
8
             MICHAEL ROBERTS: And human capital.
9
             ADAM ZUCKERMAN: And the human capital to
10
    make this problem disappear.
11
              MICHAEL ROBERTS: Well --
12
             ADAM ZUCKERMAN: Everyone you're talking to
13
    is gonna shout over your problem. And the way that
14
    Google works -- you can go into the explanation --
15
    it's never gonna work.
16
             MICHAEL ROBERTS:
                               Uh-huh.
17
             ADAM ZUCKERMAN: Okay?
             MICHAEL ROBERTS: By don't say "disappear."
18
19
    Because the magic number is --
20
             ADAM ZUCKERMAN: Yeah, don't get into --
21
             MICHAEL ROBERTS: The magic number is 128 or
22
    lower.
             ADAM ZUCKERMAN: Forget -- you're getting
23
24
    him -- you're getting too complicated.
25
              MICHAEL ROBERTS: Page 12. Page 12.
                                                         13
```

1	ADAM ZUCKERMAN: You, you guys can sit for
2	(Inaudible - speakers talking over one another.)
3	ADAM ZUCKERMAN: four hours and talk about
4	those details. The differentiating factor is? Is we
5	get it to go away however you want to call it,
6	disappear rather than shout over it. Okay?
7	So everybody else is trying to create
8	positive stuff to go over the top of it? We want to
9	get it to go away. So that, you know. And then, and
10	the positive stuff can be there or be or not be
11	there.
12	SPEAKER UNKNOWN: Yeah
13	(Inaudible - speakers talking over one another.)
14	MICHAEL ROBERTS: They used (inaudible.)
15	SPEAKER UNKNOWN: (Inaudible.)
16	SPEAKER UNKNOWN: Okay.
17	RYAN PAGE: So, all right? We remove the
18	cancer and then we ha and then you know, but
19	it's not to say those services don't help. The
20	problem is is that you're get they're selling you a
21	long-term solution when you have a short-term pain.
22	We go in and we address the pa that
23	immediate pain, and then we have other solutions. One
24	is we sell you you know. Once we've taken care of
25	that, we can sell you an analysis. Do you want to see

(big-meeting 01-28-11) 1 how your reputation is doing online? It's, again, 2 it's a small up-sell, just to profit from some of the 3 (inaudible) success. The next step is like, Look at, you know --4 5 because I like to give people an option, because 6 they -- you know. Then if they say, Well, that's -- I 7 can't spend \$5,000 a month for the next year. 8 That's okay. Well, we can offer less. You 9 know? So we'll take away -- you know, so you start taking away value rather than taking (inaudible) and 10 11 dropping prices. And then if people say, Well, I 12 really want all that value, then, Well, that's our 13 prices. 14 So the idea would be that, you know, maybe 15

So the idea would be that, you know, maybe the ultimate package for these people -- and again, these are professionals -- is that we want to have them in a package where on a monthly basis we are cleaning up negative things on the report to whatever degree possible, and we're helping build positive stuff out there.

16

17

18

19

20

21

22

23

24

25

So it's a removal and building campaign where, you know, where there's not like -- it's not like we're saying, Hey, we removed three pages a month. We're just --

ADAM ZUCKERMAN: On the board the other day,

1 Ry -- or just a couple hours ago, Ryan put on here 2 first thing we want to do is we want to 3 (inaudible) proof --SPEAKER UNKNOWN: 4 Mm. 5 ADAM ZUCKERMAN: -- build a trusting 6 relationship. Once that's in place we want to go to 7 step 1 or 2, whatever you want to do. I call it zero. 8 We want to analyze your problem completely. Provide 9 you with a proposal. Then we want to sanitize. we want to build. Okay? 10 11 So first is to prove that we can actually do 12 what we say we're gonna do. Then we want to analyze 13 your problem. Then we want to sanitize you. And then 14 we want to build you up. 15 So the SEO and all the positive stuff, that's 16 part of positive reputation building. Which is all 17 great. And we're gonna claim that we are better than 18 anybody else out there at doing that. 19 But everybody likes to do that. But they're 20 doing it not for the purpose of getting good press, 21 they're doing it to hopefully have what they put out there suffocate the negative stuff. And it doesn't 22 23 work. 24 SPEAKER UNKNOWN: And I didn't do, um, 25 Michael's guy, Nick? But I did ReputationDefender.

```
1
    And I paid for them. And they put out positive PR and
 2
    everything else. It doesn't even rank on the first
 3
    five pages of Google.
             KIRK McMAHAN: Five pages it doesn't?
4
 5
             DARREN MEADE:
                           No.
6
             ADAM ZUCKERMAN: Because -- you're late to
7
    the party and you can learn about this later. But the
8
    pitch is is that, and what would be nice is if we can
9
    tie in somehow the concept or a trademark value
10
    derivative of our proprietary --
11
             PAUL PORTELLI: Technology.
12
             ADAM ZUCKERMAN: -- algo -- no. Our -- if
    you can get through someone's head? Google has a
13
14
    humility algorithm. If you can get it through the
15
    customer's head that the Evil Emperor has design for
16
    its own profits.
17
             MICHAEL ROBERTS: (Inaudible.)
18
             ADAM ZUCKERMAN: Okay? The ability --
19
             SPEAKER UNKNOWN:
                               Uh-huh.
             ADAM ZUCKERMAN: -- to have one person say
20
21
    something negative about you and have it outrank a
22
    hundred people saying something positive about you.
23
    Do you believe Google's capable of that, sir?
             Oh, absolutely.
24
25
             Well --
                                                         17
```

MICHAEL ROBERTS: That's a good point.
ADAM ZUCKERMAN: let me prove to you that
they are. Okay? Now, knowing that all the people
that are out there say that they're gonna create
positive things about you, knowing that Google's
systems are designed to promote the negative press,
what's gonna happen? Nothing.
So don't waste your money or your time.
Let's get rid of the negative stuff. Regardless of
whether there's positive stuff about you or not.
MICHAEL ROBERTS: Right.
ADAM ZUCKERMAN: Better there should be
nothing about you than one thing negative

nothing about you than one thing negative.

MICHAEL ROBERTS: And I can give a quick
pitch to explain from 30,000 -- or 60,000 feet what

actually happens in practice so you can tell -- pitch

it as, as it comes naturally, so.

ADAM ZUCKERMAN: And a great --

SPEAKER UNKNOWN: And I'm the reference of

20 ReputationDefender versus --

ADAM ZUCKERMAN: And a, and --

(Inaudible - speakers talking over one another.)

ADAM ZUCKERMAN: And a great --

24 (Inaudible - speakers talking over one another.)

ADAM ZUCKERMAN: And a great marketing --

```
1
    next marketing campaign, a terrific marketing
 2
               If you could actually write -- if you
    campaign.
 3
    haven't already -- a very succinct and powerful piece
4
    that's on the website about why Google's humility --
 5
             MICHAEL ROBERTS: I've got it.
6
             ADAM ZUCKERMAN: -- algorithm.
7
             SPEAKER UNKNOWN: Yeah.
                                                 \bigcirc
8
             MICHAEL ROBERTS: Yeah, got it.
9
             ADAM ZUCKERMAN: Now, if it's already
10
    there -- I'm -- I haven't even read it. But if it's
    there, create a campaign next around it that goes to
11
12
    all these people that says why your reputation's being
13
    destroyed, and how to protect against it. Okay?
14
             Think about The E-Myth, which was so popular
15
    as a book. What is the, what's the title of The
16
    E-Myth? Why Most Small Businesses Fail and What to Do
17
    About It. Right? So why your reputa -- how your
18
    reputation's being destroyed, and what to do about it.
19
             RYAN PAGE:
                          No, no. You know what we need to
20
    do with that? Is rather than doing that, because
21
    these are, these are lists that we're just gleaning.
    You know, so we don't want to spam too much because we
22
23
    could lose our --
24
             SPEAKER UNKNOWN:
                               Yeah.
25
             RYAN PAGE: -- ability to email. But you
                                                         19
```

```
1
    know what would be awesome, Craig? Is to hit like
 2
    the, the XBanker and DCS client list, all those small
 3
    businesses. I mean, you have a lot of bust outs in
    it, but again, you got 20, 30 thousand names.
4
 5
              KIRK McMAHAN: Yeah.
6
              RYAN PAGE: That you can just send out.
7
    mean, one respect, you know, we can, we can filter
8
    them, but there's, you know, there's always, there's
9
    always somebody in there.
10
             ADAM ZUCKERMAN: What if we could get an auto
11
    bot that would just take all 20 or 30 thousand names
12
    and immediately put them on the Ripoff Report?
                                                     Then
13
    send them.
14
              MICHAEL ROBERTS: No no no no no no no no
15
    no.
16
             SPEAKER UNKNOWN:
                                No.
17
             KIRK McMAHAN: Oh, I -- that thought went
18
    through my head on Monday when I first learned
19
    anything about Rexxfield.
20
             MICHAEL ROBERTS: But you went through,
21
    right? And just kept on going.
             KIRK McMAHAN: I'm like, Well hey, if we ever
22
23
    run out of people.
24
              (Multiple speakers laughing.)
25
              SPEAKER UNKNOWN: So --
                                                         20
```

```
1
             RYAN PAGE: You don't have anything on the
 2
    Ripoff Report? Refresh your browser.
 3
              (Multiple speakers laughing.)
             ADAM ZUCKERMAN: I told you -- didn't I tell
4
 5
    you how fast that could happen? Try to get that off
6
    now.
 7
             RYAN PAGE: Well, let me ask you a question.
    Can -- with the process that removes, can you reverse
8
9
    it?
             MICHAEL ROBERTS: No. Well, uh, yeah. Yeah,
10
11
    we could. Yeah.
             RYAN PAGE: So you can say you have the power
12
    to -- we have the power to take away and to bring it
13
14
    back?
15
             MICHAEL ROBERTS: Yeah.
16
             ADAM ZUCKERMAN: I love the ransom scenario.
    It's nine ninety-five --
17
18
             MICHAEL ROBERTS: It would actually be --
             ADAM ZUCKERMAN: -- and you get to pay
19
    125 bucks a month or it comes back times 5.
20
21
              (Multiple speakers laughing.)
22
             MICHAEL ROBERTS: Or 7, right?
23
             CHRISTYNE IRELAND: Yeah, make you pay --
24
             SPEAKER UNKNOWN: Yeah.
25
             CHRISTYNE IRELAND: If you default on your
                                                         21
```

```
1
    payment it comes back.
 2
             KIRK McMAHAN: That's a nice clause in the
 3
    contract.
             MICHAEL ROBERTS:
                               Well, yeah, um.
4
 5
             PAUL PORTELLI: Can't do that.
6
             MICHAEL ROBERTS: (Inaudible) because I was
7
    thinking because of --
8
             CHRISTYNE IRELAND:
                                 Why?
             MICHAEL ROBERTS: Because of the -- well, no,
9
    no. Because of the, um, the high, the high rate? If
10
    they -- you can tell they really want it but they
11
    can't afford it, um. mean, we could conceivably,
12
    because they cost us almost nothing, we could
13
14
    conceivably --
             ADAM ZUCKERMAN: We could take it --
15
16
             MICHAEL ROBERTS: -- finance it.
17
             ADAM ZUCKERMAN: We could take it down --
18
        (Inaudible - speakers talking over one another.)
             ADAM ZUCKERMAN: -- and we could finance it.
19
    And say, As long as you -- we don't send you to
20
    collections.
21
             MICHAEL ROBERTS: Yeah. We don't need to.
22
             ADAM ZUCKERMAN: We don't, we don't come
23
    after you legally. We just take our finger off the
24
25
    button.
                                                        22
```

```
1
             MICHAEL ROBERTS: Yeah. We're holding the
 2
    keys.
 3
              CHRISTYNE IRELAND: Yeah. There's a
    doctor --
 4
 5
              MICHAEL ROBERTS: We're holding --
 6
              CHRISTYNE IRELAND: -- in Chicago who, as far
 7
    as I can tell by the Ripoff Reports, who has
    collected --
 8
 9
              MICHAEL ROBERTS: What's their name?
10
              CHRISTYNE IRELAND: -- about 50 grand and not
11
    delivered services on it.
12
              SPEAKER UNKNOWN: Yeah.
              MICHAEL ROBERTS: Was it P --
13
14
             CHRISTYNE IRELAND: So he can probably afford
15
     it.
16
              MICHAEL ROBERTS: (Inaudible)?
17
             CHRISTYNE IRELAND: Unless there's a gambling
18
    problem.
19
             ADAM ZUCKERMAN: So, without having a long,
20
     laborious lebate on -- debate on Friday --
21
         (Inaudible - speakers talking over one another.)
             ADAM ZUCKERMAN: Um, I think a targeted
22
23
    campaign --
         (Inaudible - speakers talking over one another.)
24
25
             ADAM ZUCKERMAN: Now. I don't know to what
                                                         23
```

extent we can play this off. But <mark>I would love to run</mark>
a campaign, I'd love to run a undermine an
underground campaign to people that basically says,
Google's destroying your reputation. Find out why.
MICHAEL ROBERTS: Yeah. And we humility
algorithm, we come up. It could be a third you
know, just a blogger talking about this humility
algorithm. It'll come bring them straight in.
ADAM ZUCKERMAN: Well, what will be great is
to send a campaign out. You know? I mean literally,
you know, what if you could say, you know, Facebook
and Google your popularity is destroying your
reputation.
RYAN PAGE: You know what we ought to do is a
Facebook ad where you can just do a Facebook ad and
say, you know, Is Google out to destroy your
reputation?
I mean, there are Facebook ads, like what
we're doing for our Progenex stuff? I mean, pennies
for hun like hundreds of thousands of impressions.
MICHAEL ROBERTS: Hm.
RYAN PAGE: It would be just, just a trader
warehouse. I mean, you're gonna have, you know,
people all across the board. But you can start
trading on stuff from the side

```
1
         (Inaudible - speakers talking over one another.)
 2
             ADAM ZUCKERMAN: I love the, Is Google out to
 3
    destroy your reputation? With a subtitle.
             MICHAEL ROBERTS: No, Have you been Google
 4
 5
    Doo'd?
 6
             ADAM ZUCKERMAN: (Inaudible) -- huh?
 7
              MICHAEL ROBERTS: Have you been Google Doo'd
 8
    on?
         Did somebody Google doo on you? It's like Google
 9
    poop.
           Doggy doo? Google doo.
             ADAM ZUCKERMAN: Put that right next to
10
     (inaudible.)
11
12
             MICHAEL ROBERTS: No, I think it's wonderful.
13
             ADAM ZUCKERMAN:
                               Okay.
14
              MICHAEL ROBERTS: I've got the domain.
15
             ADAM ZUCKERMAN: It took you three times for
16
    me to, for me to understand what you were just telling
17
    me.
18
              MICHAEL ROBERTS: That's -- and I knew that.
19
    That's why I said it three times.
20
              ADAM ZUCKERMAN: Oh, good. Well, say it
21
    three times in a marketing campaign it's gonna be
22
    three times as expensive.
              (Multiple speakers laughing.)
23
24
              ADAM ZUCKERMAN: So, so that translates to,
25
    You've been shit on by Google.
```

```
MICHAEL ROBERTS: Yeah.
 1
 2
              ADAM ZUCKERMAN: What to do about it?
 3
              MICHAEL ROBERTS:
                                Yeah.
              ADAM ZUCKERMAN:
                               Well, let's send that out.
 4
 5
     I understood that.
 6
              MICHAEL ROBERTS: Google scat.
 7
              ADAM ZUCKERMAN: Yeah.
 8
              SPEAKER UNKNOWN: Google (inaudible.)
 9
              KIRK McMAHAN: We don't need any bags or
10
    bottles in this one.
11
              ADAM ZUCKERMAN:
                               No.
                                    Um.
12
              SPEAKER UNKNOWN: (Inaudible.)
13
              RYAN PAGE: That's the analysis, is the
14
    x-ray.
15
              ADAM ZUCKERMAN:
                               Yeah.
                                      The x-ray, right.
16
              RYAN PAGE: We had it on the XBanker site.
17
              CHRISTYNE IRELAND:
                                  Wow.
              MICHAEL ROBERTS: If we know a cartoonist we
18
19
    get somebody to draw a dog with spots in -- the same
20
    color as Google's, spots on its back, just crapping on
     somebody sitting minding their own business, you know,
21
    reading a book or something.
22
              SPEAKER UNKNOWN: Cartoons are good.
23
24
              MICHAEL ROBERTS: Have you been Google Doo'd?
25
    I think it'll work. I really do.
```

```
1
              ADAM ZUCKERMAN: You also have to translate a
 2
    lot of the terminology that you're used to in
 3
    Australia to English.
             MICHAEL ROBERTS: Don't you say "doggy doo"
4
5
    here?
6
              SPEAKER UNKNOWN:
                                No.
7
             CHRISTYNE IRELAND:
                                  No.
8
             MICHAEL ROBERTS: Really?
              SPEAKER UNKNOWN: Yeah, I did when I was
9
    four, I think.
10
11
              (Multiple speakers laughing.)
12
              SPEAKER UNKNOWN: When you were still
13
    getting --
14
              CHRISTYNE IRELAND: (Inaudible.)
15
              SPEAKER UNKNOWN: -- your mouth washed out
16
    with soap? I have not yet heard avery (phonetic)
17
    dude.
18
              MICHAEL ROBERTS: But --
             ADAM ZUCKERMAN: I've heard avery shit
19
20
    outside, but.
             MICHAEL ROBERTS: I, I re -- I registered the
21
22
    domain.
23
              SPEAKER UNKNOWN: And pooh.
24
              MICHAEL ROBERTS: Yeah. Google pooh.
25
              CHRISTYNE IRELAND: (Inaudible) doo.
                                                         27
```

```
MICHAEL ROBERTS: Google pooh.
 1
 2
             CHRISTYNE IRELAND:
                                  (Inaudible) commercial.
 3
              SPEAKER UNKNOWN:
                               Yeah.
 4
              MICHAEL ROBERTS: But it actually looks
 5
    really good, Google doo, all the "o's." If you know
 6
    what I'm saying.
 7
             ADAM ZUCKERMAN: So anyway, regardless, we'll
    come up with a good marketing campaign to test. But I
 8
    like the idea of, The Evil Empire is out to destroy
 9
    you. And I love the idea of, The more popular you are
10
    the more dangerous it is.
11
             Um, and giving people the, the, the scare
12
    tactic of, The more exposure you have on LinkedIn,
13
14
    Facebook, Google, you know, et cetera, and Twitter,
15
    the faster it is that your enemies are eventually
16
    gonna attack you. And you're gonna lose. Because
17
    Google makes it so that they can win.
18
             And I think there's a whole 'nother'
19
    sub-campaign we've got, a tactic of write the parents.
    You know? Send them a picture of their kid with a
20
    gun, with a gun in his mouth. Google did it.
21
22
             MICHAEL ROBERTS: Ooh.
23
             ADAM ZUCKERMAN: What?
             MICHAEL ROBERTS: Maybe we can use a
24
25
    different brand for that. Like registered in,
                                                         28
```

```
1
    somewhere.
             PAUL PORTELLI: South Africa.
 2
 3
             MICHAEL ROBERTS: Galapagos Islands or
4
    something.
 5
         (Inaudible - speakers talking over one another.)
             ADAM ZUCKERMAN: Little Johnny's unhappy.
6
 7
             MICHAEL ROBERTS: Yeah.
8
             ADAM ZUCKERMAN: Google killed him.
             RYAN PAGE: Google-Cide.
9
             ADAM ZUCKERMAN: Google-Cide.
10
             CHRISTYNE IRELAND: (Inaudible.)
11
             MICHAEL ROBERTS: He committed Google-Cide,
12
                  \bigcirc
13
    yeah.
14
             ADAM ZUCKERMAN: Little Johnny's gonna commit
15
    Google-Cide.
16
         (Inaudible - speakers talking over one another.)
17
             ADAM ZUCKERMAN: Can you stop it? Can, can
18
    you help --
19
             CHRISTYNE IRELAND:
                                  (Inaudible.)
             ADAM ZUCKERMAN: Can you help little Johnny
20
    before he commits Google-Cide?
21
             RYAN PAGE: No, actually, actually say
22
    Google-Cide is, Google-Cide is Google's attempt to
23
    destroy your reputation.
24
25
             ADAM ZUCKERMAN: You know, like homicide.
                                                         29
```

```
1
             RYAN PAGE: Yeah. It's, it's -- or, or
 2
    they --
 3
         (Inaudible - speakers talking over one another.)
             RYAN PAGE: You know, people used to just,
4
5
    you know, used to just get bumped or whacked. Now you
    get Google-Cide. You know? It's the new homicide.
6
7
    Where they just destroy your reputation online, where
    everybody lives and where you're -- where you, you
8
9
    know, where you exist.
10
             SPEAKER UNKNOWN: Right.
11
             CHRISTYNE IRELAND: The site is worse than
12
    identity theft.
13
             SPEAKER UNKNOWN: I wonder if you can get
14
    that domain. I bet you could.
15
             RYAN PAGE: I, I guarantee you, you can get
16
    it.
17
             CHRISTYNE IRELAND:
                                  Google-Cide?
18
             ADAM ZUCKERMAN: Now what would be best is?
19
    Is to figure out why it is that, with all the hits
20
    you're getting and all the (inaudible) you're getting,
21
    you're de -- de-indexed.
             MICHAEL ROBERTS: That's why I'm saying we
22
    need a different brand for that one.
23
24
             SPEAKER UNKNOWN:
                               Yeah.
25
             MICHAEL ROBERTS: Google doesn't smite.
                                                       So.
                                                         30
```

1	VIDV McMAHANI. Voob I was kind of thinking
	KIRK McMAHAN: Yeah, I was kind of thinking,
2	be careful how much you really want to piss them off.
3	MICHAEL ROBERTS: Yeah. Yeah. Well, I
4	track. Every night we run a, a tra a track, all
5	the key words that we ran for? So if ever anything
6	drops down, the at that point, you know, you need
7	to make a big fuss. Look what they're doing because
8	we're doing this.
9	RYAN PAGE: You're kidding me.
10	ADAM ZUCKERMAN: What?
11	MICHAEL ROBERTS: Taken?
12	RYAN PAGE: Google-Cide is taken.
13	MICHAEL ROBERTS: Maybe with maybe their
14	PR people did it.
15	RYAN PAGE: Well, and in fact it has, uh.
16	MICHAEL ROBERTS: Who owns it?
17	RYAN PAGE: I'm trying to see.
18	MICHAEL ROBERTS: Google, Inc.? That ad in
19	itself would tell you something.
20	RYAN PAGE: John Melisman in Minnesota.
21	PAUL PORTELLI: Is it just parked or is it an
22	actual website with relevant content?
23	RYAN PAGE: I don't see. I mean the guy, the
24	guy put it in his own name.
25	MICHAEL ROBERTS: Google homicide?
	31

1	RYAN PAGE: Maybe it's a 403, so there's
2	nothing there.
3	MICHAEL ROBERTS: If you, if you did
4	RYAN PAGE: I mean there would be no
5	trademark there or anything.
6	MICHAEL ROBERTS: If you did the idea the
7	association with the Google doo. And, and the poop
8	would just be a Google-colored poop on the ground.
9	SPEAKER UNKNOWN: You guys continue for a
10	second. I gotta call Scott Reid. He's calling me.
11	(Inaudible.)
12	ADAM ZUCKERMAN: Anyway, that's all I wanted
13	to talk about. If you guys want to breeze a little
14	bit.
15	RYAN PAGE: So Paul, there's a couple things
16	I need, um, if you can do this weekend or when you
17	have a chance. Is I'd like to know if how many
18	like how many doctors, surgeons, you know. You know,
19	I'd like to see categories. Maybe just what, like
20	what we can find on Ripoff Report?
21	MICHAEL ROBERTS: Yeah. I have an index of
22	them all.
23	RYAN PAGE: Yeah. So if you can just give me
24	the number. I just want you know, like, um, you
25	know. So, so our doctors and surgeons, and then

```
1
    dentists and orthodontists.
              PAUL PORTELLI: For the whole study?
 2
 3
    many --
              RYAN PAGE: I just need to get an idea of
 4
 5
    what we can kinda, look at what we can (inaudible) on.
 6
              KIRK McMAHAN: Chi -- chiropractors are good,
 7
    too.
 8
              RYAN PAGE: Yeah.
 9
              KIRK McMAHAN: Not, not as good as doctors,
    but still pretty good.
10
11
              CHRISTYNE IRELAND: Mechanics.
              RYAN PAGE: Basically I want, I want to
12
13
    hit -- yeah, but I'm not -- I want, I want to hit
14
     first people who have the highest propensity to pay,
15
     and --
16
         (Inaudible - speakers talking over one another.)
17
              SPEAKER UNKNOWN: Accountants, lawyers.
18
         (Inaudible - speakers talking over one another.)
19
              CHRISTYNE IRELAND: (Inaudible) lawyers.
20
              RYAN PAGE: You guys are, you're cutting me
21
    off, so let me -- just shut up and let me go through
22
    my phrase. And then you can get the stuff I missed
    off.
23
24
              So I want to hit my health care professionals
25
    first. Then I want to know the numbers on lawyers.
```

```
1
    And then CPAs. And that's what I want for right now.
 2
    You know? And then if they have something broader
 3
    it's like small businesses. But I just think our, um.
    I just think our, um, professionals should be the
4
 5
    first one to get.
6
             And I just need to know like what our decibel
7
    market is and then we can figure out, you know, how we
8
    best want to, um, how we best want to adjust
    (inaudible.)
9
10
              PAUL PORTELLI: Okav.
11
             RYAN PAGE: And then --
12
             MICHAEL ROBERTS: When you're ready.
13
             RYAN PAGE: Okay, go ahead.
14
             MICHAEL ROBERTS: In a nutshell, the, the
15
    thing that, when I started measuring this stuff, I
16
    mean, maybe two years ago, I noticed that positions 3
17
    and 4 were almost always a gripe site. Ripoff Report,
18
    Complaintsboard.com, Scam.com, stuff like that.
19
    Almost always 3 and 4. When, when they did actually
20
    appear. Some people have a clean record, there's no
21
    problem.
22
             But nobodies didn't really have that problem.
23
    It was, you know, people that had a fairly significant
24
    Google presence. So I started tracking it. I have an
25
    application that actually tracks it every time I run
```

the report.

And the 3 and the 4, the negative stuff -- and they're basically in red, these flat-line ones? They would maybe jump between 3 and 4, but pretty much stay at 3 and 4. Whereas everything else would be all over the place. Sometimes down to 15, back up to 7. And that in itself says that, Hey, there's something, there's something broken here. Or something fixed actually probably more to the point.

Now, in May of this year the -- Google changed its algorithm. And it was called the "caffeine." Caffeine is the name they gave to this algorithm update. And what happened is they now -- whereas in the past you were only allowed to have a maximum of two listings on Google for your website. You might see Rexxfield and then the indented one? Services, Rexxfield services?

Now -- well, actually here you've got a high-ranking site up to four places.

SPEAKER UNKNOWN: Yeah.

MICHAEL ROBERTS: (Inaudible) for certain key words. Not always. So what this has meant, meant is that the 3 and 4, what I call the "humility slots," sometimes can be as low as 5 and 6, maybe 6 and 7 even.

```
1
              It's, it's been -- it's actually a lot more
 2
    random and it's harder to visually see right now, but
 3
    it's still there. And it took me a while to work it
 4
    out. But once I started compensating for the extra
 5
    allowance, given like you might get one site with 3
 6
    and another with 2, whereas before it would only been
 7
    2 and 2 or whatever. It's still, it's still in this
 8
    range.
 9
              But the next page, if this was page 2?
    Position 1 on page 2 is -- appears to be a fairly
10
    regular humility slot. So positions 3 through 6,
11
12
    page 1 -- they're not always. It could be any one of
13
    those, or usually two. But they kind of want -- they
14
    seem to want two on page 1 and usually one on page 2.
15
    More to the top. So there's still a pattern there.
16
              So don't ever say, We make it dis --
17
    disappear. Say, Effectively disappear, sure.
18
              RYAN PAGE: Yeah, we indicate -- I mean,
19
    basically talking to these people it's like, Look at,
20
    like how, how often do you search beyond the first
21
    page of Google?
22
              PAUL PORTELLI: "Disappear" shouldn't be
23
    used --
24
              MICHAEL ROBERTS: Ever, yeah.
25
              PAUL PORTELLI: At all? The -- it should
                                                         36
```

```
1
    be -- really I think the way that it should be
 2
    explained --
 3
         (Inaudible - speakers talking over one another.)
              PAUL PORTELLI: It will gradually drop off.
 4
 5
    Within a week it'll be below a hundred. That's our
 6
                 It'll be below --
    guarantee.
 7
              MICHAEL ROBERTS: Well, I, I say 60.
              PAUL PORTELLI: -- a hundred results.
 8
                                                     Okav.
    60.
 9
              MICHAEL ROBERTS: Yeah.
10
11
              PAUL PORTELLI: And then it will continue to
12
    gradually drop off, until it's virtually impossible --
    don't use the word "impossible" though, because if it
13
14
    doesn't get below then you might have a problem with
15
    the --
16
              MICHAEL ROBERTS: Effectively, or --
17
              SPEAKER UNKNOWN:
                                So --
18
              MICHAEL ROBERTS: -- for all intents and
19
    purposes.
20
              PAUL PORTELLI: There are gonna be certain
21
    key words that you don't want to use, though.
22
              RYAN PAGE: I know, I know, but --
23
              PAUL PORTELLI: Like --
24
              RYAN PAGE: And, and believe me on this, like
25
     there's part of it like in terms of a sales process
```

```
1
    where you're always gonna have, you know, there's
 2
    gonna be a little bit of give and take on the
 3
     language.
 4
              I mean, you try to put all the stuff in
 5
    place.
            Like you -- we've had, we've had sales process
 6
    where we've had people like, Look, you can never say,
 7
     I guarantee this. And you knew, you listened to every
 8
     single call, that no rep ever, ever said "guarantee"
 9
    on it.
10
              And you have the one customer who's ticked
11
    off who's gonna say, They told me, they guaranteed
12
     that you can get me a hundred thousand dollars.
13
             And like, No, we didn't. Because I listened
14
     to every call and we have it all recorded. I can
15
     listen to your calls right now.
16
              PAUL PORTELLI: Uh-huh.
17
              RYAN PAGE: So, I mean, so part of that is is
18
     that, yes, you need to be careful on the language and
19
    other things like that. And -- but I don't want you
20
    guys to get like, you know, really bent out of shape
21
     if you -- if it comes back. I mean, part of -- it's
22
     just -- it's sometimes cheaper just to --
23
         (Inaudible - speakers talking over one another.)
              PAUL PORTELLI: -- not to say "disappear"
24
25
    or --
```

1	MICHAEL ROBERTS: Yeah, hang just hang on
2	a second. I'm, I'm, I'm more worried about Ripoff
3	Report, something getting back to there. Because, you
4	know, with one and-a-half million pages, um, if they
5	ran, ran a, a change, like a purge of all the file
6	names and changed them to something else?
7	See, Google is based on the actual page
8	itself. So all the stuff that we do on the outside to
9	persuade Google that, You don't want to look at this.
10	You don't want this. And this is all, you know, all
11	over the place.
12	All of a sudden we're pointing at nothing.
13	And, and they just rename all their pages. Now, that
14	would throw their, their own Google index out for
15	months.
16	PAUL PORTELLI: Right. Because you gotta
17	keep in mind that Ripoff Report, obviously they're
18	making all they're gonna come off of AdWords,
19	right?
20	SPEAKER UNKNOWN: Yeah.
21	SPEAKER UNKNOWN: So you, you don't want them
22	to get wind that now they're they have because
23	they think they've got
24	RYAN PAGE: Look
25	PAUL PORTELLI: just a profit, a profit.
	39

```
1
              RYAN PAGE: Look, the way, the way, the way
 2
    that we'll talk about it is by simply saying, Look,
 3
    Google has a humility algorithm. It places negative
    content in your first line of sight before the page
4
 5
    break when you look on a web, web page. Which is your
6
    first five or six listings.
7
             Below that you have to scroll down, and you
8
    monitor. That's called page 1.
9
              PAUL PORTELLI: Uh-huh.
             RYAN PAGE: And anything on page 1 is gonna
10
11
    hurt you. The higher to the top, the worst. Page 2
12
    hurts less. Page 3 even less. And then you get down
13
    to page 4, 5, and 6 and you get to the point where
14
    somebody doesn't know what they're looking for, or --
15
              PAUL PORTELLI: You've already refined --
16
             RYAN PAGE: -- or they're just a nut who's
17
    just gonna search.
18
              PAUL PORTELLI: Yeah.
19
         (Inaudible - speakers talking over one another.)
20
              RYAN PAGE: We call that "Google oblivion."
21
    And so it's like --
22
              PAUL PORTELLI: Right.
             RYAN PAGE: You just, you just -- everybody
23
24
    knows.
25
             MICHAEL ROBERTS: Like the ghetto.
                                                  The
                                                         40
```

1 Google ghetto. 2 RYAN PAGE: The Google ghetto. 3 MICHAEL ROBERTS: Yeah. RYAN PAGE: Yeah. That's a -- that's all we 4 5 have to say is like, Look, this stuff's on your front 6 pa -- we're looking at people who have, you know, 7 primarily on the first page? Like there's zero value 8 proposition. 9 Like, you know, like when our, you know, our 10 Ripoff Report for Progenex? Was on like page 5. You 11 know. So if you came to me and said, Hey, you know, 12 we'll charge you a thousand dollars to remove your 13 Ripoff Report? 14 I'd sav --15 (Inaudible - speakers talking over one another.) 16 PAUL PORTELLI: Another reason for being 17 careful about how it's phrased is because within the 18 first week or two they -- we have to be careful to say 19 that if they searched for their name plus Ripoff, that 20 it may show up in the results, right? Within the 21 first -- until it's gradually so far gone that it 22 won't even come up in the first page or second page of 23 that. 24 CHRISTYNE IRELAND: Well, if you add Ripoff 25 in the search you can pull it up on purpose.

```
1
         (Inaudible - speakers talking over one another.)
 2
              PAUL PORTELLI: Well, it just depends on how,
 3
    it just depends on how the system is run. Look,
4
    we'll --
 5
             CHRISTYNE IRELAND: Just from the experience
6
    that I've had from all the entries that I did in the
7
    last couple days? I have to say that it seems like
8
    the majority of the Ripoff Reports -- not necessarily
9
    other complaint forums but specifically --
10
              SPEAKER UNKNOWN: Yeah.
             CHRISTYNE IRELAND: -- Ripoff Report -- shows
11
12
    up standardly between 9 and 36.
13
             MICHAEL ROBERTS: The position?
14
             CHRISTYNE IRELAND: Yes.
15
             MICHAEL ROBERTS: Okav.
16
             CHRISTYNE IRELAND: There was a few today
17
    that were actually 1 and 2 position.
18
              MICHAEL ROBERTS: Uh-huh.
19
              CHRISTYNE IRELAND: Um, but standardly it
20
    seems like it's between 9 and 36.
21
             MICHAEL ROBERTS: Okay. And did you see any,
22
    um, if they're --
23
              CHRISTYNE IRELAND: And there were some that
24
    were just pushed completely --
25
              RYAN PAGE: See, I wouldn't even, I wouldn't
                                                         42
```

```
1
    even go three pages deep when you're skimming for
 2
     leads.
             (Inaudible.)
 3
             CHRISTYNE IRELAND: Well, he has me set up
     for a hundred.
 4
 5
         (Inaudible - speakers talking over one another.)
 6
              CHRISTYNE IRELAND: A hundred entries. A
 7
    hundred ranks.
             MICHAEL ROBERTS: Oh. Well, you're, you're
 8
 9
    doing --
              CHRISTYNE IRELAND: Yes.
10
             MICHAEL ROBERTS: -- the full page.
11
12
             CHRISTYNE IRELAND: Uh-huh.
13
              MICHAEL ROBERTS: What she's doing is a
14
    control command find to find where it is.
15
              SPEAKER UNKNOWN: So in the first hundred?
16
              MICHAEL ROBERTS: (Inaudible) it's easier to
17
    find it.
18
              SPEAKER UNKNOWN: That's how we --
19
         (Inaudible - speakers talking over one another.)
20
              RYAN PAGE: But in terms of the people we hit
21
     in our --
         (Inaudible - speakers talking over one another.)
22
23
              RYAN PAGE: But in terms of the people we hit
    in our database? Because if you're telling me that
24
25
    we -- we're hitting -- part of that 73 is that we're
                                                         43
```

```
1
    hitting people that have a Ripoff Report that's like
 2
    five pages deep?
 3
              MICHAEL ROBERTS: It's even better.
              RYAN PAGE: Then that number is even better.
4
 5
              MICHAEL ROBERTS: But here's the deal.
6
    have to look anyway. They have to search anyway to
    see where it is. So do we just, after running the
7
8
    search do we still copy it in and then move on?
9
    Because some of them are new and they're working their
10
    way up.
             RYAN PAGE: Oh, that's true. Yeah, I guess
11
12
    the thing is is that they know it's there --
13
             CHRISTYNE IRELAND:
                                  Just so you guys know.
14
              RYAN PAGE: -- they know either way.
15
             CHRISTYNE IRELAND: On -- if you're looking
16
    at the same thing that I set up? The first ranking
17
    number is its number as it's ranked in the Ripoff
18
    Report summary of all the reports for plastic
19
    surgeons.
20
             The second ranking number is where it ranks
21
    on their Google search per that doctor or firm,
22
    whatever it is.
23
              MICHAEL ROBERTS: Now, you're searching for
    the doctor's name and the clinic's name too; is that
24
25
    right?
```

1	PAUL PORTELLI: That's what
2	CHRISTYNE IRELAND: Depending on what's
3	primarily listed.
4	MICHAEL ROBERTS: Okay.
5	CHRISTYNE IRELAND: Yeah.
6	PAUL PORTELLI: Okay, so wait. I didn't even
7	know this. The ranking that you're giving it, the two
8	ranking boxes that I have?
9	CHRISTYNE IRELAND: Uh-huh.
10	PAUL PORTELLI: One is below the clinic name
11	or business name, the other one is below the doctor's
12	name or the person's name. You mean that the ranking
13	that you
14	CHRISTYNE IRELAND: They're actually, they're
15	above and below.
16	PAUL PORTELLI: Okay.
17	CHRISTYNE IRELAND: Yeah.
18	PAUL PORTELLI: So the, the ranking in the
19	first rank box
20	CHRISTYNE IRELAND: The first ranking is how
21	it ranks within Ripoff Report.
22	PAUL PORTELLI: Uh-huh.
23	CHRISTYNE IRELAND: The second ranking is how
24	it ranks within the search from the URL?
25	PAUL PORTELLI: Yeah.
	45

```
CHRISTYNE IRELAND: That I used to search --
 1
 2
             PAUL PORTELLI: Yeah.
 3
             MICHAEL ROBERTS: The hundred --
             CHRISTYNE IRELAND: -- for that doctor --
4
 5
             MICHAEL ROBERTS: The hundred (inaudible.)
6
             CHRISTYNE IRELAND: -- or spa, or practice.
7
             PAUL PORTELLI: So you understand that,
8
    right?
            Do we need to, do we need to still --
9
             MICHAEL ROBERTS: Probably don't --
             SPEAKER UNKNOWN: -- (inaudible.)
10
11
             MICHAEL ROBERTS: Yeah, we probably don't
12
    really need to know where it's coming in Ripoff
13
    Report, because in practice it's really the Google --
14
             CHRISTYNE IRELAND: You guys (inaudible) the
15
    box.
16
             MICHAEL ROBERTS: Yeah, sorry.
17
             PAUL PORTELLI: No, no, no. Well, I
18
    apologize if that was confusing. But the, the way
19
    that should have, that should be done? You should do
20
    one search on the business name to find out the
21
    ranking, or the clinic name to find out where it's at
22
    in Google. And then do a separate search again for
    the person's name or the doctor's name in Google.
23
24
             SPEAKER UNKNOWN: That's what I thought.
25
             PAUL PORTELLI: What we want to give, what we
                                                         46
```

```
1
    want to give them is --
 2
              CHRISTYNE IRELAND: There's not always both
 3
    listed.
              SPEAKER UNKNOWN:
4
                                Yeah.
 5
              PAUL PORTELLI: Okay.
         (Inaudible - speakers talking over one another.)
6
7
              PAUL PORTELLI: And if that's the case just
8
    put a dash or.
9
              MICHAEL ROBERTS: Or blank, or.
10
              PAUL PORTELLI: Blank is fine.
11
              SPEAKER UNKNOWN:
                                There's somebody --
12
         (Inaudible - speakers talking over one another.)
13
              PAUL PORTELLI: Sorry about that.
14
              SPEAKER UNKNOWN: -- order some Progenex.
15
              SPEAKER UNKNOWN:
                                There's no one here?
16
             SPEAKER UNKNOWN:
                                Yeah.
17
              SPEAKER UNKNOWN: (Inaudible.)
18
              CHRISTYNE IRELAND: Because most of the time
    what I'll do is I'll copy how it's listed on the
19
20
    Ripoff Report and paste it in my search (inaudible.)
21
    So if it says Dr. So-and-So at such-and-such spa --
22
              MICHAEL ROBERTS: Well.
23
              CHRISTYNE IRELAND: -- that's what I search
24
    for.
25
              MICHAEL ROBERTS: Okay. Yeah.
                                              Or. um.
                                                         47
```

```
1
              CHRISTYNE IRELAND:
                                  Because if there's a
 2
    doctor that's specified, you mostly want to do it on
 3
    that.
         (Inaudible - speakers talking over one another.)
4
 5
              RYAN PAGE: Hey, man. Hey, great job at the
6
    throw down, man.
7
              SPEAKER UNKNOWN: Oh, thanks.
8
         (Inaudible - speakers talking over one another.)
9
              CHRISTYNE IRELAND: And if somebody's going
10
    to a new spa and --
11
         (Inaudible - speakers talking over one another.)
12
             CHRISTYNE IRELAND: -- and they're gonna
13
    go --
14
         (Inaudible - speakers talking over one another.)
15
              CHRISTYNE IRELAND: -- listing on Ripoff
16
    Report --
17
         (Inaudible - speakers talking over one another.)
18
              SPEAKER UNKNOWN: What about tomorrow, you
19
    guys (inaudible)?
20
              SPEAKER UNKNOWN:
                                Now where at?
21
              SPEAKER UNKNOWN: UTC tomorrow?
22
         (Inaudible - speakers talking over one another.)
23
              CHRISTYNE IRELAND: And they're like, Oh,
    that doesn't concern me --
24
25
         (Inaudible - speakers talking over one another.)
                                                          48
```

```
1
              SPEAKER UNKNOWN: -- local.
 2
         (Inaudible - speakers talking over one another.)
 3
              MICHAEL ROBERTS: You, you might find they
    have multiples, but.
 4
 5
              CHRISTYNE IRELAND: Oh, yeah, there's
 6
    multiples.
 7
              MICHAEL ROBERTS: But, so you're actually
 8
    doing a compound search --
 9
         (Inaudible - speakers talking over one another.)
10
              MICHAEL ROBERTS: You're doing a compound
11
     search of their name and the clinic, right? The name
12
    and the clinic?
13
              CHRISTYNE IRELAND: Whatever's primarily
14
     listed on --
15
              MICHAEL ROBERTS: Okav.
16
              CHRISTYNE IRELAND: -- the title of the
17
    Ripoff Report is what I'm searching for.
18
              MICHAEL ROBERTS: Okay, okay. From this
    point forward --
19
20
                   (Audio cuts out at 35:22.)
21
                    (Audio resumes at 36:31.)
22
         (Inaudible - speakers talking over one another.)
23
              RYAN PAGE: It's like a ingrown like hair.
     It's like a couple -- it's like right where my T-shirt
24
25
     is when I work out.
```

```
CHRISTYNE IRELAND: Looks like spider bites.
 1
 2
              MICHAEL ROBERTS: It does. That's what I was
 3
    thinking.
 4
              RYAN PAGE: Yeah. I was too.
 5
              CHRISTYNE IRELAND: Yeah. Some, some will do
 6
    like --
 7
         (Inaudible - speakers talking over one another.)
 8
              CHRISTYNE IRELAND: -- right next to each
 9
    other. Like fleas, you know, fleas will bite like
10
     right next to each other.
11
         (Inaudible - speakers talking over one another.)
12
              MICHAEL ROBERTS:
                                Mmm, tasty.
13
              CHRISTYNE IRELAND: No, it looks more like
14
    spider bites.
15
              SPEAKER UNKNOWN:
                                Ah.
16
              SPEAKER UNKNOWN: Um --
17
              RYAN PAGE: It could be, you know.
                                                  It's
    driving me nuts, but.
18
19
              MICHAEL ROBERTS: But you are right, though.
20
    There's gonna be, there's gonna be searches in there
21
    that --
22
         (Inaudible - speakers talking over one another.)
23
              MICHAEL ROBERTS: -- they're, they're
24
    probably not that worried about yet. It's on page 3
25
    or 4.
```

1	RYAN PAGE: Yeah. But if they respond then
2	may then it's something they may have a
3	conversation about.
4	MICHAEL ROBERTS: But it tells me something
5	about their quality.
6	CHRISTYNE IRELAND: Well, the guy that called
7	in? He was funny. He actually has a lot of reports.
8	MICHAEL ROBERTS: Yeah.
9	CHRISTYNE IRELAND: He's like, Well, I had
10	one a couple years ago and it's pretty much gone.
11	I'm thinking, Dude. Like I saw three more
12	today on him after I talked to him.
13	(Inaudible - speakers talking over one another.)
14	RYAN PAGE: when you talk to somebody you
15	have to like, what you have to do is
16	(Inaudible - speakers talking over one another.)
17	CHRISTYNE IRELAND: I didn't say that, but
18	yeah.
19	RYAN PAGE: But you do need, but you need to
20	be able to say, You know, I mean, maybe you might want
21	to search a little bit because, you know, there
22	actually are a lot. And if you're searching Google
23	while you're signed in you might not be seeing what
24	your customers see. Because at this search I found X,
25	Y, and Z, you know? And, um.

MICHAEL ROBERTS: The other thing is Google
will only maybe put one or two of them there. So if
one of them's disappeared it's because two worse ones
are out there.
CHRISTYNE IRELAND: Yeah. Well, and
sometimes, um, like there was a girl who posted a
report two times in one day. Like an hour apart she
posted the same report. But in the second report she
added the doctor's middle initial.
MICHAEL ROBERTS: Hmm.
CHRISTYNE IRELAND: Well, it shows up as two
reports.
MICHAEL ROBERTS: Hmm.
CHRISTYNE IRELAND: But then when you do a
search there's one.
MICHAEL ROBERTS: Uh-huh.
RYAN PAGE: Well, let's keep, let's keep
doing what we're doing there.
CHRISTYNE IRELAND: So, um.
RYAN PAGE: And Michael, if you can, um.
CHRISTYNE IRELAND: But I am, in the notes
section I mentioned this to Adam. In the notes
section down at the bottom of the sheet that I'm
working on? If there's postings from Scam.com,
Complaints Board, Ripoff Report, BBB

1	MICHAEL ROBERTS: Uh-huh.
2	CHRISTYNE IRELAND: pending lawsuits,
3	anything like that, it'll have notes if there's a
4	bunch of them. Or it'll say multiple reports and a
5	bunch of stuff.
6	MICHAEL ROBERTS: Okay.
7	CHRISTYNE IRELAND: Because sometimes they'll
8	have like, um, Vitals.com, MD WebMD, like
9	Complaints Report.
10	MICHAEL ROBERTS: Mm.
11	CHRISTYNE IRELAND: Or Complaints Board,
12	Scam.com, before you even get to
13	MICHAEL ROBERTS: The Ripoff Report.
14	CHRISTYNE IRELAND: the Ripoff Report.
15	MICHAEL ROBERTS: Yeah. And that's why
16	CHRISTYNE IRELAND: So the ranking
17	technically for any negative is not accurate, because
18	I'm doing the ranking for the Ripoff Report.
19	MICHAEL ROBERTS: Based on that, yeah. And
20	that's
21	CHRISTYNE IRELAND: Yeah.
22	MICHAEL ROBERTS: That's the question I was
23	gonna ask. Whenever you see them down further is it
24	because there's Scam and Complaints above?
25	SPEAKER UNKNOWN: Yeah, I suppose so.
	53

1	MICHAEL ROBERTS: As long
2	CHRISTYNE IRELAND: Sometimes, but sometimes
3	they're all mixed in. It seems like Complaints Board
4	actually very frequently writes just before Ripoff
5	Report.
6	MICHAEL ROBERTS: Okay.
7	CHRISTYNE IRELAND: Sometimes well, I
8	haven't seen that many Scam.coms, but they'll come in
9	before it too.
10	RYAN PAGE: Well, um, one of the things,
11	Michael, that, um, you know and Paul probably put
12	this in your minds ahead. Is, you know, around maybe
13	some concepts of how we might package some kind of a
14	product. Like, you know, some kind of analysis? You
15	know.
16	And a web analysis should be something that,
17	that Paul or someone that's trained could really, you
18	know, that we can say, Hey, why don't you do an
19	analysis on this client? And we'll figure out like a
20	template. And I know how to format those where it's
21	really easy to fulfill.
22	MICHAEL ROBERTS: Uh-huh.
23	RYAN PAGE: I mean, I used to have I've
24	had, I've had some that are like two-page reports or
25	three-page page reports. Ninety percent of it's a

```
1
    template that's used going in there and pasting what
    you find type thing.
 2
 3
              MICHAEL ROBERTS:
                                Mm.
              RYAN PAGE: But where there might be some,
4
5
    you know, there might be some stuff we can really show
6
    them they can go, Wow, you guys found all this stuff
 7
    on me. Like I have 47 negative stuff in the first 50.
8
    And so --
9
              CHRISTYNE IRELAND: So it would be a
10
    diagnostic?
11
              RYAN PAGE: Yeah, we have some kind of --
12
              CHRISTYNE IRELAND: Some kind of diagnostic?
13
              RYAN PAGE: Yeah, some kind of diagnostic.
14
    But it should be something that takes us, you know,
15
    that a 15-to-20-dollar-an-hour employee could do in,
16
    you know, 15 minutes.
17
              PAUL PORTELLI: Well, what we'll do is we can
18
    probably set up a, like a web app once --
19
         (Inaudible - speakers talking over one another.)
20
              RYAN PAGE: I'm not worried about --
21
         (Inaudible - speakers talking over one another.)
22
              PAUL PORTELLI: Not right now.
                                              That can be
23
    something that can definitely be done in the future.
         (Inaudible - speakers talking over one another.)
24
25
              RYAN PAGE: Yeah.
```

1	PAUL PORTELLI: I'm not talking about right
2	now.
3	RYAN PAGE: Yeah, it'll be (inaudible.)
4	Right now I just want to know, like, you guys put some
5	ideas together. We'll we can, we can you and I
6	can we can discuss on Monday and kind flush out
7	like what it might look like?
8	PAUL PORTELLI: Yeah.
9	RYAN PAGE: But what this analysis might look
10	like. What kind of things you would put on there. So
11	that somebody sees it and says, Wow, I have a problem.
12	And when Kirk, he I, I laugh because we
13	had this idea of a Coke bottle. And what we did is
14	we, we had within XBanker it had a concept we called
15	the "business x-ray."
16	And what it was, it was one page, and it was
17	a snapshot of the things that, that you would find on
18	a credit report. Like, one, do they even have a D&B?
19	Do they have this? You know. We'd find like ten
20	things that were wrong with their business. Why
21	they'd get denied walking into a bank, regardless of
22	their credit score. You know?
23	So we'd show, Okay, well, your business phone
24	number that you gave me is actually a home phone
25	number in an apartment complex. You're not gonna get

```
1
    financing.
 2
              You know, so the x-ray -- but it was one
 3
           It took us about 10 minutes to put together.
    page.
    Charged a hundred bucks for it. And it led to our
4
 5
    sales calls. You know, because it gave you all the
6
    data.
7
              Um.
                   Now, on the website we had a picture --
    and I don't know where we found it -- but it was a, it
8
9
    was basically a picture of a x-ray of a person and
10
    there's a Coke bottle in them. So like basically a
11
    Coke bottle is like through their rectum up into their
12
    system.
13
             And so -- I mean, it was Photoshopped in
14
    there.
15
              SPEAKER UNKNOWN:
                                Right.
16
              RYAN PAGE: So that's where, you know, Kirk
17
    was like so, you know, he was so ticked. Take that
18
    freakin' Coke bottle off the Web page.
19
              Because the idea was like, You look healthy
    but, you know, let me do the x-ray. And like, Oh,
20
21
    you're, you're not healthy.
22
              (Multiple speakers laughing.)
23
              MICHAEL ROBERTS: I can't believe that.
24
              RYAN PAGE: Yeah.
25
         (Inaudible - speakers talking over one another.)
```

```
1
              RYAN PAGE: So -- but that was the graphic
 2
    designer, who's a little more creative than I was.
                                                         So
 3
    anyway, that's the Coke bottle reference.
 4
              But the i -- the concept was there. So on
 5
    this analysis, like it might be the reputation x-ray.
 6
              MICHAEL ROBERTS:
                                Mm.
 7
              RYAN PAGE: Or, you know, or -- but that's
 8
    what you want to do, is you want to be able to show
 9
    somebody what the pain is. So --
10
              SPEAKER UNKNOWN: Yeah.
11
              RYAN PAGE: -- I just need your ideas --
12
              PAUL PORTELLI: You know, Rep --
13
    Reputation.com has like a similar type of deal, so
14
    what we'll do is kind of --
15
              RYAN PAGE: You just figure out what
16
     (inaudible) there.
17
              PAUL PORTELLI: Yeah.
18
              RYAN PAGE: What kind of things we want to be
    in there. And --
19
20
              MICHAEL ROBERTS: Well, Tony, Tony can help
21
    us with that, too.
              RYAN PAGE: In terms of automating it or in
22
    terms of?
23
24
              MICHAEL ROBERTS: Well, helping us to kind of
25
    work -- they, they really want to get us going because
```

1	we feed them so much in leads.
2	RYAN PAGE: Well, see, what I'm looking at
3	here is that when we get to the build? We're
4	essentially selling an ongoing monthly SE you know,
5	SEO-type solution.
6	MICHAEL ROBERTS: Yeah, but they're building
7	it now, and we can license it. I think we need to get
8	them here and work out how we can
9	RYAN PAGE: Yeah.
10	MICHAEL ROBERTS: plug into them, and.
11	Because their (inaudible) so many people do that.
12	Like, you know, there's, there's SEO guys out there
13	that do that stuff where they'll plant bombs and then
14	sell the service and remove them. And, um.
15	PAUL PORTELLI: We already ran into one guy
16	that did a, kind of a reverse, a reverse of a
17	reputation campaign against a lady that it's a long
18	story. But the lady had hired this SEO company to do
19	a removal of a particular link on the, on the Web.
20	And somehow the company that she had hired
21	got upset with her, thought she was asking too many
22	questions or something, and they reversed it.
23	(Inaudible - speakers talking over one another.)
24	PAUL PORTELLI: All the techniques that they
25	use to assist their other customers right? That

they're making money off of, I guess. They used that against her and blasted her with just a ton of bad, bad reports.

Her ranking immediately, like the thing that she was trying to hide was back on the first page of Google. She had Ripoff Report. She had just the first three or four pages of Goggle was full of bad crap. So, yeah, there's companies that would do that.

RYAN PAGE: So what we need to do is, um. So if you think of these two areas -- like these three areas: Analyze, sanitize, and then, you know, rep -- build or whatever you do.

You know, like on the sanitization, that might be some of the things that we might do that might involve, you know, lawyer letters, removal letters. Um, you know, maybe it's using some of the guys in India, some of the things that they might be able to do. You know, whatever we would sell somebody that we would fulfill.

We wouldn't necessarily tell anybody what we're doing, but. We know we've got a lot of stuff removed just by, okay, the girl from PitchEngine. Hey, this article's kind of garbagey, will you take this off?

Yeah, I'll take it off.

You know, so. There's things we can do to sanitize people in those regards. Um, you know, I'm sure you guys have more tricks up your sleeve in terms of seeing what we can do without going on a full -- I'm not talking about the stuff we would do for somebody who is a \$20,000-a-month client.

I just want to know what our, um, you know, what kind of, what kind of solutions we can potentially put, put together as offers.

MICHAEL ROBERTS: Yeah.

RYAN PAGE: And then the next one is gonna be, um, what we can do for, um, um. For like the build for like an SEO. Um, and what that package might be.

So Michael, I don't know what like, um, you know, what Think Basis and those guys have for solutions and that. Like what we want from a sales -- you have, you have to reverse it in from a sales operation and realize that, you know, you're gonna need 15, 20 percent going towards the sales operation in terms of commissions to a sales rep and a sales manager.

And then, you know, if you're passing something through you're gonna want to at least make 50 percent of whatever you pass through. So that

1	whatever
2	MICHAEL ROBERTS: Well, there's a lot of
3	it's very service heavy, though. Our fulfillment
4	costs would be a lot higher than what we're doing
5	here, for example.
6	RYAN PAGE: On some of the builds?
7	MICHAEL ROBERTS: Yeah. They're, they're
8	paying me 30 percent. And that's, that's
9	really good. Because basically when people come in
10	through Rexxfield and we hand them off we're already
11	upping the price over what any other SEO gets for the
12	same work.
13	We know they're gonna do a good job. So that
14	30 percent really is 50 percent of what we get what
15	anybody else would get for the job.
16	RYAN PAGE: So we're taking their, their cost
17	to do something and just marking it up 30 percent?
18	MICHAEL ROBERTS: Um, well, I've been letting
19	them bill them. Because and they just send, they
20	just send me a check or write it off against the, the
21	finance thing?
22	RYAN PAGE: Uh-huh.
23	MICHAEL ROBERTS: But either way, if we
24	can but I don't I kind of like the idea of
25	passing it on. Because the client assumes, Well, hey,
	62

1 well, they're just passing it on, so we'll take their 2 They know what they're doing. advice. 3 RYAN PAGE: Yeah. MICHAEL ROBERTS: Whereas if we're selling it 4 5 ourselves it's kind of, Well, all that sales pitch 6 might have just been a sales pitch. 7 RYAN PAGE: But there's not a -- well, 8 this -- and that's why we need to take, you know, 9 think about how we might -- some creative ways we 10 might, you know, do some of this. Because, for 11 instance, like with, um. 12 The sanitizer would be something we would do. 13 That would be a Rexxfield solution, right? 14 MICHAEL ROBERTS: Yeah. 15 RYAN PAGE: So, and the building would be 16 something that we would, we would use a traditional 17 SEO company to do. 18 MICHAEL ROBERTS: Yeah. 19 RYAN PAGE: But, you know, are there build 20 things that we could do internally that wouldn't 21 necessarily be SEO? Like, for instance, like 22 ReputationDefender isn't doing any SEO. They're 23 doing, you know. They're just doing like some press releases, 24 25 they have some articles, and they're doing some

1	different positive things that are going out?
2	MICHAEL ROBERTS: Uh-huh.
3	RYAN PAGE: You know, are there build things
4	that we would do that would be in a package that we
5	would sell and fulfill? And then, you know. And then
6	other things we would pass off.
7	Because for Think Basis like, you know,
8	making 30 percent, you know, on big consulting
9	packages, where we're just passing it off and we're
10	making a passthrough?
11	MICHAEL ROBERTS: Uh-huh.
12	RYAN PAGE: That works. But that's also a
13	sale that's a C-level-type sale that, you know,
14	you're doing.
15	MICHAEL ROBERTS: Uh-huh.
16	RYAN PAGE: Where we're not paying, you know,
17	a sales rep something.
18	MICHAEL ROBERTS: Uh-huh.
19	RYAN PAGE: You know? So that's, that's just
20	where I want to make sure that we have, you know.
21	Anything we can fulfill internally is obviously gonna
22	be a product that we can build a lot of revenue out
23	of.
24	MICHAEL ROBERTS: Yep. And I but. Uh,
25	the stuff that we do? It's there's no guarantees.

1 It's, Buyer, we're gonna do our best. You, you need 2 to pay for the work. Whereas SEO is kind of like 3 that, but people have higher expectations. You know, we're, we're doing critical need 4 5 stuff. SEO there's, there's business aspects and 6 everything else involved. We're not -- (inaudible) 7 you know. It's just something --8 RYAN PAGE: Well, maybe what -- maybe this 9 build -- maybe there's four different solutions here. 10 Maybe there is we analyze, sanitize, build. And then 11 we also have companies we partner with that do, you 12 know, search engine optimization, pay per clicking, 13 and other things. 14 PAUL PORTELLI: Right. 15 RYAN PAGE: Whereas our build solution would 16 be -- because for us -- for me to copy what 17 ReputationDefender is doing? Would be very easy. You 18 know what I mean? They give you the list of 20 Web 19 pages they're doing. 20 We can find copywriters all day long who will 21 write, you know, for 50 bucks will write somebody a 22 bio, five different versions of it, that we can go and 23 post on the different Web pages and build up some 24 positive things, so.

And that's all ReputationDefender is doing.

```
1
    And so I'm just saying what are some other things that
 2
    we can build into our own build program that would be
 3
     separate than a full-on SEO? And the reason why is I
 4
     think, I think we're gonna have tiers of clients that
 5
     are gonna come.
 6
             We have like these, like the heads of state?
 7
    These big multi-national corporations, all right?
    These whales? They'll pay 20 grand a month.
 8
 9
              MICHAEL ROBERTS: Yeah.
10
              RYAN PAGE: The, you know, a plastic surgeon,
11
     a lawyer, you know, you're looking at, I mean, two,
12
    grand maybe.
13
              PAUL PORTELLI: Yeah.
14
              RYAN PAGE: And it just depends what they
15
           You know, like when, you know, when -- even
    just within Progenex, which is, you know, I mean, you
16
    know, Progenex is doing, you know, we'll do about
17
18
     $200,000 in revenue this month. So with $200,000 in
19
     revenue there's no way I can budget $5,000 a month for
20
    SEO.
21
         (Inaudible - speakers talking over one another.)
22
              RYAN PAGE: And we're all in business.
23
             PAUL PORTELLI: Authorized statement. What
    would, what would keep you from doing pay per click
24
25
    against a person (inaudible) Authorized Statement? In
```

```
1
    the same sense what would keep you from doing a
    generic Authorized Statement pay per click campaign?
 2
 3
             For anybody that searches for their own name
    and sees that it comes up on Ripoff Report that the
4
 5
    targeted -- the key word targeted is Ripoff Report,
6
    Complaints Board, et cetera. At each of the
 7
    (inaudible.) Of course you'd have to invest a lot of
8
    money with pay per click, but that takes care of
9
    having to set up --
10
             MICHAEL ROBERTS: Yeah, you can say --
             PAUL PORTELLI: Or get the organic --
11
        (Inaudible - speakers talking over one another.)
12
13
             MICHAEL ROBERTS: You can say, Fred Smith --
14
             SPEAKER UNKNOWN: As we get --
15
             MICHAEL ROBERTS: -- responds to Ripoff
16
    Report --
17
             SPEAKER UNKNOWN:
                               Yeah.
18
             MICHAEL ROBERTS: -- extortion. He refuses
    to pay this. Yeah. Accuse them of extortion.
19
20
             RYAN PAGE: Well, sometimes from a PR
    standpoint if you -- if something's buried? Then you
21
22
    don't necessarily want to draw attention to it, too.
23
              PAUL PORTELLI: Well, for people that
    don't --
24
25
         (Inaudible - speakers talking over one another.)
                                                         67
```

1 PAUL PORTELLI: For people that opt not to, 2 to pay for the full, the full deal? Then -- and it's 3 also something that's gonna come into play that would generate more leads as people -- there's kind of a 4 5 whole system behind this. 6 Because if we could get our Authorized 7 Statement to organically show up in the top results 8 instead of Goggle optimizing to show these negative 9 results? If we had Google with -- at a point where 10 they would optimize -- we could optimize it for, um, 11 it to be up in the 2, 3, 4, 5? 12 That way when somebody sees a doctor, if that 13 doctor's name comes up then there would also be a 14 close link saying authorized statement.com/doctor's 15 And then there's a quick little blurb of text 16 with their explanation of their side of the story, 17 right? 18 And so if you get that up to -- organically 19 you get that up to the same position in the top page 20 of the first page, right? 21 SPEAKER UNKNOWN: Uh-huh. 22 PAUL PORTELLI: Then you're going -- we're 23 going to, um, have a lot of people clicking through that. And then once they get to Authorized Statement 24

we'll be the brand that backs up Authorized Statement,

```
1
            Even those it's -- is that the, the nonprofit,
    right?
 2
    or?
 3
             MICHAEL ROBERTS: Nonprofit, yeah. Well,
    Authorized Statement --
4
 5
         (Inaudible - speakers talking over one another.)
6
              PAUL PORTELLI: So there's a whole idea
7
    behind that.
8
              MICHAEL ROBERTS: Yeah.
                                       Getting offered as a
9
    service, too, as part of (inaudible) also gives the --
10
              PAUL PORTELLI: I mean, you want to talk
11
    about, you want to talk about generating auto --
12
    auto-generating links that would pay for them? That's
13
    the way to do it right there. But to kick it off we
14
    do AdWords to kick it off.
15
              SPEAKER UNKNOWN: I, I, I --
16
              PAUL PORTELLI: And then once we've got it to
17
    a point where it's organic? Then you've got people
18
    that, when they do Google their own name or they find
19
    out that they've got a Ripoff report, they'll see
20
    that, click into it.
21
              They'll be able to set up their own auth --
    their own statement. Their side of the story.
22
                                                     Ιt
23
    would be limited, kind of like Twitter, to maybe two
24
    or three paragraphs. Just a real quick thing.
25
             MICHAEL ROBERTS:
                               They can limit --
```

```
1
         (Inaudible - speakers talking over one another.)
 2
              PAUL PORTELLI: Maybe a link to their own
 3
    website. It's, it is, um, what is it called?
4
    Authenticated that it's actually their name. So we'd
 5
    have to have a copy of their driver's license or what
6
    have you to prove that it's that particular person,
7
    right.
8
              So this is their chance to get out their side
9
    of the story. Becomes very highly ranked in the
    organic circles.
10
             MICHAEL ROBERTS: Have I run through my
11
12
    statement with you?
              PAUL PORTELLI: Okay. So, I mean, you want
13
14
    to talk about being able to generate leads to, to do
15
    this?
16
             RYAN PAGE: Well, I'm just thinking about
17
    the, the most important right, right now for us.
18
              PAUL PORTELLI: Yeah, I know right now, but.
19
             RYAN PAGE: Is next -- yeah. So let's
20
    just -- I mean, in terms of the now for the next 30 to
21
    60 days? The most -- the big stuff will continue to
22
    come. We'll, we'll get the PR and we'll work on those
23
            But what I want to be able to do is get a base
24
    of operations in place --
25
              SPEAKER UNKNOWN: Yeah.
```

1	RYAN PAGE: where we can sell products.
2	And so what we need to do is we need to producize
3	(phonetic) services. Which is step number one from
4	going from a boutique consultancy to a consulting
5	business.
6	And so, you know, there are things that we
7	you guys offer and can do that are part of consulting
8	packages and things like that?
9	PAUL PORTELLI: Yeah.
10	RYAN PAGE: What we need to figure out is
11	like, Well how can we package a bunch of things into a
12	service that doesn't require an expert to do that we
13	can, that we can train? Maybe it takes a little bit
14	of an expert. But we can start putting it into
15	products.
16	SPEAKER UNKNOWN: Uh-huh.
17	RYAN PAGE: And that's where, where we know
18	that we're selling this is a \$3,000 solution and it
19	costs us \$500 to fulfill.
20	PAUL PORTELLI: Authorized Statement is
21	essentially an anti-Ripoff Report (inaudible)
22	Complaints Board.
23	PAUL PORTELLI: As soon as it starts to, as
24	soon as that starts to build, it's gonna go.
25	PAUL PORTELLI: Yeah.

```
1
              SPEAKER UNKNOWN: Yeah. That's --
 2
             MICHAEL ROBERTS: And it go -- it feeds leads
 3
     (inaudible.)
              PAUL PORTELLI: The more -- every time I
4
 5
    think about that I see a different angle. And it just
6
    gets bigger (inaudible.)
7
             MICHAEL ROBERTS: I mean, all those lists
8
    that were made --
9
              PAUL PORTELLI: It absolutely has to be done.
10
              MICHAEL ROBERTS: This email is --
11
              PAUL PORTELLI: We need to get to that
12
    (inaudible) within six months.
13
             MICHAEL ROBERTS: So this email that we're
14
    making, even with the drip follow up?
15
              PAUL PORTELLI: That's right. We set up, we
16
    set up one for them automatically, to where their name
17
    is at least coming up. And then they can --
18
             MICHAEL ROBERTS: What I'm saying is this is
19
    not yet being --
20
              PAUL PORTELLI: Like click here to fill out
21
    your profile.
22
              RYAN PAGE: Yeah, so --
              PAUL PORTELLI: We're already harvesting the
23
24
    data.
25
             RYAN PAGE: Yeah, that's -- well, that's the
                                                         72
```

```
1
    thing is like, I mean, we've had leads from businesses
 2
    from the last two, three years. And we always find
 3
    that, Hey, well we can, you know. Hey, we can -- like
4
    I was saying today. Well, why don't we hit these
 5
    people up for the reputation thing? I mean.
6
             PAUL PORTELLI:
                             Uh-huh.
7
             RYAN PAGE: We have the leads. Um. but the
8
    real thing is just getting like, you know, the Ripoff
9
    Report removal is a product. We can say, We will do X
10
    for Y.
             PAUL PORTELLI: You can take that another
11
    step further. You can do the same thing that the
12
    Ripoff Report competitors and copycats are doing with
13
14
    their copying the RSS feeds. We build out an absolute
15
    competitor of these, these --
             MICHAEL ROBERTS: Oh, yes.
16
17
             PAUL PORTELLI: -- complaint platforms?
    We've already know -- we already know where to get the
18
19
    platform.
             MICHAEL ROBERTS: There's a guy offering --
20
             PAUL PORTELLI: We just found it.
21
22
             MICHAEL ROBERTS: A guy's offering it for
    free to us. We can actually duplicate --
23
24
             PAUL PORTELLI: Okay.
25
             MICHAEL ROBERTS: -- anything. Or brand it
                                                        73
```

1	as a						
2	PAUL PORTELLI: Hey.						
3	MICHAEL ROBERTS: You weren't finished?						
4	Sorry. Yeah, you're interrupting. I'm but I'm						
5	stealing your thoughts.						
6	(Inaudible - background speaker talking at the						
7	same time.)						
8	MICHAEL ROBERTS: But anyway. Next						
9	(inaudible.)						
10	RYAN PAGE: Yeah, so, so right now, like over						
11	this weekend so like on Monday we can like start						
12	flushing some of these things out.						
13	SPEAKER UNKNOWN: Yeah.						
14	RYAN PAGE: So we can start figuring out what						
15	we need to do to build fulfillment around some of						
16	these things? You know, we didn't and we don't						
17	need to finalize it, we just need some ideas of what						
18	we throw in the concept, you know.						
19	So here is a package that I would sell. And						
20	all we need to do is like, okay, here is like the						
21	deliverables that we would put in it. And then						
22	roughly how many hours it would take to fulfill by						
23	what level of an employee.						
24	Because if you tell me its gonna take						
25	15 hours with a \$200-an-hour employee then I'm like,						

1	Okay, well that's something I gotta sell. If it's					
2	something I if it's something that a \$10-an-hour					
3	employee that's trained can do in an hour.					
4	PAUL PORTELLI: Yeah.					
5	RYAN PAGE: That's something else. And that					
6	gives us what that gives us the basis of what our					
7	fulfillment cost is.					
8	SPEAKER UNKNOWN: Yeah, yeah.					
9	RYAN PAGE: And then we can start playing					
10	with the margins. And then there will be the stuff					
11	that we, we outsource for the SEO, but					
12	SPEAKER UNKNOWN: Yeah.					
13	RYAN PAGE: there we gotta build					
14	product internally. So if you guys can spend time on					
15	that this weekend and then, um.					
16	MICHAEL ROBERTS: Now, I have a ton of					
17	interrogatories I have to get in this weekend, so, um.					
18	RYAN PAGE: Let Paul think about it.					
19	MICHAEL ROBERTS: Yeah. I'm gonna be					
20	PAUL PORTELLI: Yeah. I got it.					
21	MICHAEL ROBERTS: But we can definitely					
22	bring some					
23	PAUL PORTELLI: Dude, I'm a little excited					
24	right now because I've got like six different really					
25	big things in my head. Little, little ideas that are					

```
1
    all coming into --
 2
             MICHAEL ROBERTS: Hey.
 3
              PAUL PORTELLI: -- a point. So --
 4
             MICHAEL ROBERTS: I've got a lead you can
 5
    warm up for me.
 6
         (Inaudible - speakers talking over one another.)
 7
              RYAN PAGE: You're what?
 8
             MICHAEL ROBERTS: I've got a lead that you
 9
    can warm up for me. This guy, you know, um.
    send you the email. And, uh, it's his pride more than
10
11
    anything, um, that's, that's affected. I ended up
12
    going down -- because I needed the money to get
    through to cover some other expenses that I can get a
13
14
    discount on -- and he didn't go for it.
15
             And he's already prepped. He understands
16
    what we can do. Are you interested in having a go at
    it? You know, Michael asked me to give you a call to
17
18
    see what we can -- and now also, he can get monkeys
19
    for us.
20
              I want to get some -- I've got a review on
21
    (inaudible) programmer. And he can actually get a one
22
    year international in. Takes care of immigration and
23
    stuff. Dirt cheap, practically pays for itself.
24
              So, but anyway, um. So I, I was bringing the
25
    price down in the hope that he could do something for
```

```
1
         But anyway, there's a potential sale there. Are
    us.
 2
    you interested?
 3
             RYAN PAGE: Yeah, do you have what you've --
             MICHAEL ROBERTS:
4
                                Yeah.
 5
             RYAN PAGE: -- told him or anything?
6
             MICHAEL ROBERTS: Let me, let me forward it
7
    to you.
8
             RYAN PAGE: Okay. I gotta get like a phone
9
    number and a Rexxfield email.
              MICHAEL ROBERTS: Yeah, we can set that up.
10
         It costs 50 bucks a year and it's more secure.
11
    Um.
12
    So we should, we should do that. There's one. And.
13
              PAUL PORTELLI: How you feeling about it all,
14
    Dude?
          Man, the reason I stopped you there is why
15
    would you say that you could get that for free?
16
    That's, that's --
17
             MICHAEL ROBERTS: Get that for free?
18
              PAUL PORTELLI: -- that's huge. The -- you
19
    were saying that, We found this guy and you said he
20
    was offering (inaudible) for free.
21
             MICHAEL ROBERTS: Yeah. Yeah.
                                              But don't,
22
    don't stop -- don't tap me three times.
23
              PAUL PORTELLI: I felt bad about that, I felt
24
    stupid.
25
             MICHAEL ROBERTS: I, I only --
```

```
1
              PAUL PORTELLI: Felt embarrassed.
 2
             MICHAEL ROBERTS: I only need one.
 3
             PAUL PORTELLI: I just got a little excited.
             MICHAEL ROBERTS:
4
                                I know.
 5
             PAUL PORTELLI: Because --
6
             MICHAEL ROBERTS: I know.
7
              PAUL PORTELLI: -- don't keep --
             MICHAEL ROBERTS: That's cool. I
8
9
    (inaudible.) And, and I'm being, you know, it's, it's
10
    all strategic.
11
             RYAN PAGE: So do you have the, do you
12
    have -- well you -- do you have a call card?
13
             MICHAEL ROBERTS: I sent you one, and I'm
14
    trying to find the other one.
15
             RYAN PAGE:
                          Okay.
16
             MICHAEL ROBERTS: I just, I just did it all
17
    on the phone. It was while (inaudible) was here. And
18
    I can't find it. (Inaudible.) Here he is, here he
19
    is. Okay. So one of them you'll have in the in box
20
    already.
21
             RYAN PAGE:
                          Okay.
22
             MICHAEL ROBERTS: Um, here's another one.
23
             RYAN PAGE: Does he need to be more full-on
24
    consulting, or is he?
25
             MICHAEL ROBERTS: Just start fresh.
```

1	RYAN PAGE: Okay.					
2	MICHAEL ROBERTS: Just go in sort of blind.					
3	But in a nutshell, he's worried because there's other					
4	things out there that, um. Apparently he brought this					
5	student in. And the student thought that his fees					
6	also included the actual tuition at the school. And					
7	he's like, No, you know, that's not what it included.					
8	So.					
9	Okay? And just sort of, Michael asked me to					
10	follow up with you, and I don't know a great deal					
11	about it. And he said you were a little concerned					
12	because there's multiple reports, and the cost. And					
13	it wasn't really a business thing it was more of a					
14	reputation thing. And that's about it in a nutshell.					
15	RYAN PAGE: Okay.					
16	MICHAEL ROBERTS: It was a while ago, and I					
17	sort of didn't take a lot of notes (inaudible.)					
18	SPEAKER UNKNOWN: And then, um.					
19	PAUL PORTELLI: What do you think?					
20	RYAN PAGE: I mean, I mean, I don't think					
21	anything right now. I mean, it's too early to tell on					
22	a lot of stuff. <mark>I mean, obviously this we knew</mark>					
23	we'd get a good response rate. It's a question of					
24	whether or not people will pay, and what price point,					
25	and what we can fulfill.					
	79					

```
1
             You know. So, I mean, I try to keep guarded
2
    optimism, but. I think right now it's, you know,
 3
    pretty good for a campaign that went out on a Friday
4
    for -- to send a campaign out on Tuesday. You know,
5
    so we'll see, you know. Unfortunately probably
    (inaudible) get buried over the weekend, but.
6
7
             MICHAEL ROBERTS: Let me send you one also to
8
    follow up. This guy didn't respond to an e -- to the
    email that I'm sending you.
9
             RYAN PAGE: Okay.
10
11
             MICHAEL ROBERTS: You'll see his name in his
    website, so it'll turn up on Ripoff Report. uh.
12
13
         Who? Ooh, ooh, who referred this to me?
    0h.
14
              (End of recording.)
15
16
17
18
19
20
21
22
23
24
25
                                                         80
```

1	CERTIFICATE
2 3 4	STATE OF UTAH)) ss. COUNTY OF SALT LAKE)
5 6 7	This is to certify that the foregoing transcript was prepared by me, KELLY L. WILBURN, a Certified Shorthand Reporter and Registered Professional Reporter in and for the State of Utah.
8 9	That the transcript was prepared from a previously-recorded proceeding at which I was not personally present; therefore, the quality of said recording may affect the quality of the transcript.
10 11 12	That said recording was then written in stenotype by me and thereafter caused by me to be transcribed into typewriting. And that a full, true, and correct transcription of said recording so taken and transcribed to the best of my ability is set forth in the foregoing pages, numbered 1 through 80, inclusive.
13 14 15	I further certify that I am not of kin or otherwise associated with any of the parties to said cause of action, and that I am not interested in the event thereof.
16 17	SIGNED ON THIS 4th DAY OF August, 2012.
